Office Action Summary	Application No. 10/601,450	Applicant(s) MARENTETTE, JOHN FRANCIS	
	Examiner Carl S. Miller	Art Unit 3747	

– The MAILING DATE of this communication appears on the cover sheet with the correspondence address –
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 6 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Miyazaki.

In particular, the Figure 1 embodiment of the reference anticipates these claims since all of the limitations of the claims will be met when the engine is off and line 64 is at atmospheric pressure.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Miyazaki.

In particular, the use of a linear spring would have been obvious since linear responses of an adjustment element create easier responses for corresponding adjustment elements such as fuel controls.

Claims 1-5, 7, 11, 13 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Miyazaki as applied to claim 6 above, and further in view of JP ('613)

Miyazaki applies as noted above and JP('613) teaches the locating the expandable member in the intake plenum with a spring-like bellows between the member and the plenum. Note that locating a spring within the enclosure as opposed to being part of the enclosure, has already been taught by Miyazaki.

It would have been obvious to locate the spring device and enclosure within the plenum as taught by JP('613) because this device also reduced the volume of the intake for the same purpose as the device of Miyazaki.

Claims 12, 15 and 17 are allowed.

Claim 20 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The applicant will note that this action has been made non-final due to the application of newly discovered art against the claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Carl S. Miller whose telephone number is 571-272-4849. The examiner can normally be reached on MTWTHF.
